About Us

Incepted in the year 2005, we are engaged in manufacturing of plastic packaging films for various applications of industrial operations. We are specialized in micro slitting and manufacturing of Identification Tapes / Marker Tapes. Our expertise and success in the industry is an outcome of our strict adherence to uncompromising quality standards and a determination to offer our clients with the high level of satisfaction.

Our Products

- LLDPE Stretch Film UV Stabilized, VCI, Colored, Printed (Manual and Machine Grade)
- LDPE Shrink Film (Plain / Perforated / Printed / Tubing / U-Fold)
- LDPE Surface Protection Film / Guard Film
- Micro-slit Films
- Identification Tapes / Marker Tapes (BOPP or Polyester Film based)
- Thermal Lamination Film (BOPP or PET Film based)

LLDPE Stretch Film

Stretch wrapping film is made of superior quality food grade raw material. We also manufacture stretch films as per our client's unique specifications such as colored stretch film, UV Stabilized stretch film, VCI stretch film, Printed stretch film, etc. We are serving to quite a few premium customers all over India including MNCs.

Application :

Pallet wrapping, spiral wrapping, reel wrapping, Box wrapping, manual wrapping for safe storage, transportation and protection from dust, moisture, sun and other external factors such as weather conditions.

LDPE Shrink Film

LDPE Shrink Films are manufactured from Food Grade LDPE Virgin Polymers as per customer's specific requirement and shrink ratio. Shrink film comes in various forms such as Perforated Shrink Film, Printed Shrink Film, etc.

Application :

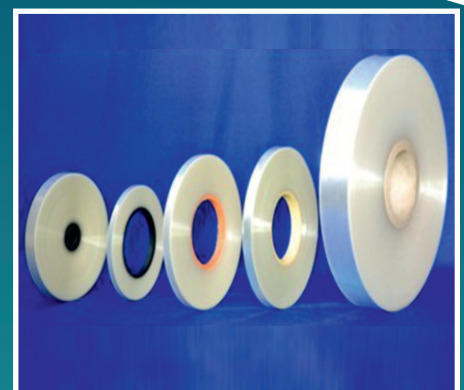

Mainly used to prevent hardships and damages during transportation and handling. It is also used as a replacement to carton box packaging specially in beverages industry.

Micro-slit Film

These are superior quality Pan Cakes (Coils) manufactured out of BOPP, Polyester & Polyethylene Films.

Application :

- Spiral wrapping on cables, explosives fuses, wires, capacitors, etc.
- Banding films for stacking purpose and banding on currency notes.

Identification Tapes / Marker Tapes

These tapes are manufactured from finest quality BOPP or Polyester films as per customer's requirements and supplied on demand in the form of coil winding or bobbin winding.

Application :

PP & HDPE Ropes, Wire Ropes, Cables, Fishing & Sports Nets, etc.

Surface Protection Film (SPF) / Guard Film

We are an established Surface Protection Film (SPF) / Guard Film manufacturer. We offer a comprehensive line of SPFs that are designed to minimize abrasion, scratching, and damage throughout the storage process as well as during the delivery process. Our specialty is Easy Peel Off (EPO) protective film.

Our protective films are resistant to the stresses of manufacturing operations such as cutting, bending, and deep drawing, as well as the effects of mechanical handling during production and transshipment. The substrate's quality is retained when the protective film is removed, just as it was when it left the manufacturer. If the customer provides a sample of the substrate, we may develop and manufacture protective film for it.

Advantages and applications of using our SPFs are:

- Provides weather resistance when used outside.
- The protective coating peels away effortlessly.
- When the protective layer is removed, the quality of the substrate's surface is preserved without leaving any residue or stains.
- Throughout the product's life cycle, uniform and stable adherence is achieved.

Application :

Can be applied on various surfaces such as Glass, Coated Steel, PEB, Vents, Conveyors, Stainless Steel, uPVC sections / profiles, Aluminium Composite Panel (ACP), Aluminium sections / profiles, PVC / PP / HDPE / HIPS / PET / ABS or other plastic surface.

Thermal Lamination Film

Thermal Lamination Films are converted out of BOPP and PET Thermal Films manufactured by world renowned companies such as Cosmo First Ltd., Garware Hi-Tech Films Ltd., Coatall Films Pvt. Ltd., etc. These films are available in Glossy, Matte, Silky Matte, Velvet, Hi-Gloss, Scuff Free, Linen, Sand, etc.

Application :

Used for all documents, photographs, book covers, duplex board cartons and other lamination purposes.
